EDUCATION

System development .NET

Campus Varberg
2023 - 2025

Additional Coursework in IT

- Introduction to Python
- Cybersecurity

Pedagogical degree, y. 4-6

Uppsala University
2016 - 2020

PROJECTS

NanyriaNest

Personal project

Library Management System

ASP.NET Core, Angular, SQL Server,
JWT Authentication

Designed and developed a full-stack library management platform using .NET 8 and Angular, delivering user authentication, book lending, search and reservation features, and administrative management capabilities within a modern web application.

LANGUAGES

Swedish Native
English Fluent

EXPERIENCE

Backend Developer (.NET / Payments)

Convene Mobility

2026 - Present

- Modernised a legacy payment platform through modular provider-based architecture.
- Built PSP integration work in C#/.NET, including OAuth2 authentication and secure token management.
- Refactored tightly coupled payment flows into decoupled provider abstractions for multiple PSPs, including Viva Payments and Windcave.
- Added integration, flow, and validation tests with xUnit, fake handlers, smoke tests, and Postman.
- Applied clean architecture and SOLID principles to improve maintainability, extensibility, and separation of concerns.

Software Developer Intern

Aire Energy

2024 - 2025

- Developed full-stack features in C#/.NET and Angular, including revenue reporting, KPI management, and data visualization tools.
- Built APIs, data processing workflows, and interactive dashboards using Highcharts.
- Collaborated in agile workflows involving code reviews, testing, and continuous delivery.

Various Schools, Varberg Municipality

Educator

2020 - 2023

- Taught students in years 4-6 across multiple schools, delivering lessons in Swedish, English, Mathematics, and Science.
- Developed structured lesson plans and adapted teaching approaches to diverse learning needs.
- Built strong communication, collaboration, and analytical skills through explaining complex concepts in a clear and engaging way.

TECH STACK

BACKEND

C#, .NET, ASP.NET Core, REST APIs,
Python

FRONTEND

Angular, TypeScript, HTML, CSS

AUTHENTICATION & SECURITY

OAuth2, JWT Authentication

ARCHITECTURE

Clean Architecture, SOLID
Principles, Dependency Injection

TESTING & TOOLS

xUnit, Postman, Git, SQL Server,
Entity Framework Core
